Technology Proficiencies

Languages:	C++, C#, Python
Web Technologies:	HTML, CSS, XML, JavaScript, Django
Test Automation:	Selenium WebDriver, Postman, JMeter
Development:	Rapid Application Design (RAD), Object-Oriented Analysis and Design (OOAD), Integrated Software Development, Microsoft Visual Studio, NetBeans 8.1, Xcode, IntelliJ IDEA
Databases:	Oracle, Sybase, MySQL, MMSQL

Professional Experience

- Analyzed user stories, scenarios, business/ product requirements, mock-ups, and technical specifications to define test approach and create test cases for various modules of the application.
- Set up the test environment, defined phases of testing, entrance and exit criteria and resources required to conduct the effort.
- Contributed to automating Regression testing using Selenium WebDriver
- Developed test scripts, identified the web Elements through locators using Firefox plug-ins.
- Used XPath to work with dynamic and static objects in Selenium
- Prepared test data for positive and negative test scenarios for functional testing as documented in the test plan
- Maintained and performed updates to automated scenarios to reflect UI pages changes
- Prepared Requirement traceability matrix (RTM) for the application to ensure full test coverage
- Performed browser compatibility testing on different versions of most common browsers
- Performed integration, functional, system, usability, cross-browser and cross-platform compatibility testing
- Involved in database testing by writing and executing SQL queries to ensure data integrity
- Collected logs using ADB command tool for Android applications
- Verified Web services API requests, response data validations in REST protocols
- Analyzed software failures, reported bugs via bug tracking tool with detailed bug description, screenshots and logs
- Generated weekly testing reports for upper management
- Filed improvement tickets to refine the functionality of the application
- Performed bug verification testing of fixed issues to confirm change of the status and close the issues
- Participated in regular project team meeting to discuss testing process, business requirements, assignments and progress

Veriflow Systems, San Jose 2017 January-current position

Software Test Engineer - with full system development lifecycle experience, including designing, developing and implementing test plans, test cases and test processes fueling swift corrective actions (TestRail and JIRA).

- Identified, documented and reported bugs, errors, interoperability flaws and other issues within proprietary software applications developed for VeriFlow Systems Company's global user base.
- Demonstrated methodical, detail-oriented and thorough approach to all assignments while adhering to compressed timelines. Complete all assignments on or ahead of schedule.
